

Alternate Delivery Methods

- Self-Instruction (including worksheets, workbooks, computer based instruction, video, reading)
- Laboratory
- Simulation
- Panel discussion
- Tutorial (peer based) training
- On-the-job training
- Learning activities (can include games, etc.)

Select two alternative methods of instruction for each objective and tell why

1. The students will explain the correct procedures and select the appropriate size hoseline for attaching to a fire department connection in a simulated activity in less than 5 minutes with 100% accuracy according to department policy.

2. Given a list of ventilation principles, the student will select appropriate ventilation tactics within 1 minute with 100% accuracy according to IFSTA Essentials of Firefighting.

3. Given a manikin, the students will perform CPR for 2 minutes according to the skill sheet with 100% accuracy.

4. Given one article of fire origin, the students will be able to list five causes of common fires during a 2 minute oral presentation with 100% accuracy as listed in the NFPA standard.
